

As a backbone, collective impact organization devoted to educational achievement, StrivePartnership optimizes Greater Cincinnati's urban education ecosystem to ensure that it cultivates every child from cradle to career. Essential to this objective is an Operations Team of specialists in technical areas who work with organizations and leaders within the ecosystem to help them achieve transformative, sustainable outcomes on behalf of children.

The Senior Manager for Performance Analytics is central to the Operations Team. The position manages and directs an evolving and dynamic data function at StrivePartnership that actively gathers and analyzes data within the ecosystem, which includes Cincinnati, and the cities of Covington and Newport Kentucky; creatively shares it broadly with a diverse group of stakeholders; and assists the organization's partners in utilizing data to make informed decisions. The Senior Manager for Performance Analytics develops visualization tools that help diverse audiences understand the data, provides technical support selectively to individuals and organizations, collaborates with StrivePartnership colleagues to design and implement initiatives, and oversees an evolving data operation at StrivePartnership.

The ideal candidate possesses a wealth of experience in research and data analysis; thinks creatively about how data can be made accessible and informative to an array of audiences; builds trusting and cooperative relations with school districts, educational institutions and other key partners; and is able to work collaboratively with other StrivePartnership staff members to develop and share responsibility for team projects.

In this role, the major responsibilities of the position include:

- Implement sound research and analysis to drive continuous improvement of academic interventions and supportive services within the urban education environment.
- Share relevant, timely and understandable data to internal staff, key partners, and the community at-large to foster strategic alignment and continuous improvement toward defined outcomes.
- Build an effective organizational infrastructure within Strive Partnership to efficiently manage data responsibilities.
- Provide technical support to key individual and organizational stakeholders that gives them greater capacity to achieve outcomes.

This position requires knowledge and skills normally acquired through completion of a Bachelor's or Master's degree in education, business or related fields. Also requires a minimum of five years experience in a role related to data research and analysis. Experienced engaging with educational policy, education systems, and/or community-based education program. Certification in project management desired.

This is a full-time position working in downtown Cincinnati. StrivePartnership is a part of KnowledgeWorks Foundation and offers a comprehensive benefits package (medical, dental, life, short & long term disability), a generous personal time-off package (including the week between Christmas and New Year's) and a 401(k) retirement plan.

KnowledgeWorks is an Ohio-based non-profit social enterprise that works to foster meaningful personalized learning that enables every student to thrive in college, career and civic life. KnowledgeWorks works on the ground with schools and communities through a portfolio of innovative education approaches, helps state and federal leaders establish policy conditions necessary to prepare all students for success, and provides national thought leadership around the future of learning.

Be part of a team that is focused on changing the world by changing how education is delivered. For more information, or to apply for this position, please visit the full description at <https://knowledgeworks.csod.com/ats/careersite/JobDetails.aspx?id=28>
